

Established in 1752, the **EASTON FARMERS' MARKET** is **America's longest, continuously running open-air market**. Today the market remains a **rich and colorful piece of Easton's heritage**. Each week it draws families, local chefs, foodies, and tourists.

The mission of the **EASTON FARMERS' MARKET** is to provide **fresh, high quality, local produce and food products** directly from regional farms and businesses to the **2,500 consumers** every Saturday. Our market family – a passionate group of farmers, entrepreneurs, chefs, and artists – is fully committed to their craft and dedicated to **making our world a better, healthier, more beautiful place**. All products sold are locally grown and produced, with most of the produce naturally/organically grown. All meat and dairy are antibiotic and hormone-free, and animals are pasture-raised. And yes, all farms undergo a full on-site inspection to ensure the quality of products you expect.
